

PROFILE SUMMARY

Full-Stack Software Developer (MERN) with 1+ year of experience building and shipping production ERP systems end-to-end - frontend, backend, database design, and third-party integrations (payments, biometric hardware, GPS). Comfortable owning a system from architecture through deployment as well as extending live client systems. Actively uses AI-assisted development workflows (Claude AI, ChatGPT) to accelerate coding, debugging, and prototyping without compromising code quality.

TECHNICAL SKILLS

- **Frontend:** React.js, HTML5, CSS3, Bootstrap, Responsive Design
- **Backend:** Node.js, Express.js, REST API Design, PHP, JavaScript (ES6+)
- **Database:** MongoDB, MySQL — schema design, queries, data modelling
- **Integrations:** Razor pay, UPI/QR Payments, Biometric Devices (ESSL K30), GPS Tracking Modules
- **AI-Assisted Development:** Claude AI, ChatGPT- used for rapid prototyping, debugging, and code generation (vibe coding) across all projects
- **Tools:** Git, Postman, XAMPP, VScode, LT Browser (Responsive Checking)

WORK EXPERIENCE

Software Developer (MERN) — Aalan Tech Soft / June 2025 – Present

Flagship Project: Harwin Interior Design ERP Management System / Role: *Full-Stack Developer & Team Lead*

- Handled the project full-stack — designed and built the frontend (React.js), backend (Node.js/Express REST APIs), and database (MongoDB schema and queries) for a multi-branch ERP covering billing, inventory, and admin management.
- Built role-based authentication (JWT) and the admin dashboard from the ground up.
- Integrated ESSL K30 biometric hardware for attendance; leading development of an in-progress GPS tracking module ("Wheel on Eye") for delivery tracking.
- Used AI coding assistants (Claude AI, ChatGPT) throughout to speed up development, debug faster, and prototype features.
- Led the project as the primary developer responsible for architecture and technical decisions across the full stack.

Other Project Work (Software Developer, Aalan Tech Soft)

- **Hotel & Restaurant ERP System:** Designed the backend database schema, built REST API routes, and implemented core workflow logic using Node.js and MongoDB.
- **Berlin Tech novation:** Built static, responsive frontend UI pages, focusing on clean layout and structure.
- **Skimitar Hindustan Pvt Ltd:** Added new sections and features to an existing admin panel and company website without disrupting live functionality.
- **Tirupur Jewellery Management System:** Resolved existing bugs and added new functionality on a live system built with React.js, PHP, and MySQL, per business requirements.
- **Tamizhaga Puthiya Latchiyam Amaippusara Kattumana Thozhilargal Sangam System:** Developed the payment gateway integration, admin panel, and user login/authentication module using PHP, MySQL, and Razor pay.
- Used AI coding assistants (Claude AI, ChatGPT) across these projects for faster debugging and feature prototyping.

PERSONAL & ACADEMIC PROJECTS

Secure File Sharing Platform / MERN Stack

GitHub: [Project Link](#)

- Secure file management platform with upload/download, CRUD operations, and access protection between role-based users.

EDUCATION

- BE CSE — Thiagarajar College of Engineering, Madurai, Tamil Nadu — CGPA 7.32 | May 2025
- Diploma in Computer Science and Engineering — Muthayammal Polytechnic Institution, Namakkal — 95% | May 2022
- Class X — Rasi International School (CBSE), Namakkal — CGPA 8.0 | May 2017

CERTIFICATIONS

- MERN Stack Development — Certified Course
- AI Fluency: Framework & Foundations — Issued by Anthropic
- Introduction to Claude Cowork — Issued by Anthropic (April 2026)
